One Oath

Remote, IN

UI Designer

Sept 2023

- I am instrumental in crafting a user-centric platform enabling course completion, job searches, and diverse functionalities. I specialize in designing an intuitive interface, ensuring seamless navigation, and enhancing overall user experience

PROJECTS

- **E-commerce for Artisans:** Empowering talented artisans to showcase and sell their unique creations online. We've built a user-friendly marketplace that connects artisans with a global audience, enabling them to share their craftsmanship and boost their businesses in the digital era.
- **Deep Learning Technique for Image Forgery Detection :** Image Forgery Detection system utilizes advanced algorithms and machine learning techniques like CNN and GAN to identify and expose manipulated or forged images. This technology plays a crucial role in ensuring the authenticity and integrity of visual content, aiding in various fields such as digital forensics, journalism, and online security..
- **Hospital Management System:** Our Hospital Management System is a comprehensive software solution designed to streamline hospital operations. It enhances efficiency by automating tasks such as patient records, appointment scheduling, billing, and inventory management. This system ensures better patient care and smoother administrative processes within healthcare institutions.
- **Foodwaste Management System:** Food Waste Management System is a comprehensive solution designed to combat food waste. It empowers businesses and individuals to track, manage, and minimize food wastage while facilitating the easy donation of surplus food to those in need. This system not only reduces food waste but also fosters a culture of giving and sustainability.
